

Agustin Lacomba

Java Developer en Despegar.com

Summary

I am proficient in the following languages: JAVA, PHP, HTML, SQL and JAVASCRIPT. I have almost 5 years of experience in JAVA, using frameworks such as SPRING, WICKET, SWING and HIBERNATE; and other technologies such as AJAX, Prototype, SOLR, SVN and GIT.

My speciality is the development and design of Java web applications. I consider myself a strong Object-Oriented theoretically skilled person, and that is the reason why I really enjoy developing elegant and well-designed applications.

I started developing Java web systems on 2010, working at LOGISMATA SA for 2 years as an analyst and developer. The work methodology used was SCRUM, using JAVA and WICKET; I was also assigned an iPhone project. Also, as part of my thesis project, I worked at LIFIA for about 8 months, as a developer and researcher, using JAVA and ANDROID to develop a mobile application that uses a social net and a Recommender system for knowledge management in communities of practice. Then, I worked for Globant, using JAVA, SPRING and HIBERNATE, and SCRUM as work methodology.

Currently, I am working at Despegar.com as a JAVA Senior Analyst/Developer.

Experience

Java Developer at Despegar.com

junio de 2012 - Actualidad (2 años 1 mes)

Development and maintenance of several java web applications, which are useful for managing the administration of flight sales, touristic packages, hotel lodgings, car reservations and other tourism services. You can see the site at www.despegar.com

Technologies: JAVA, HIBERNATE, SPRING, SPRING MVC, SQL, MONGO, CASSANDRA , HTML, JAVASCRIPT, AJAX, JQUERY, GIT and SCRUM for project management.

Game Developer at Playlant

septiembre de 2013 - enero de 2014 (5 meses)

Develop Games for Web, Android and IOs plataformas.

Technologies: ActionScript, Starling and Feathers.

Java Developer at Globant

octubre de 2011 - junio de 2012 (9 meses)

Development of the Web Disney Commercial system and The Educ.ar Web site (a Learning Web site for Schools in Argentina). In the first project I developed REST services in java and in the second one I worked

on both, the back and front-end, using Spring, Spring MVC and Freemarker.

Technologies: JAVA, HIBERNATE, SPRING, SPRING MVC, SQL, POSTGRE SQL, SOLR, HTML, JAVASCRIPT, AJAX, JQUERY, SVN and SCRUM for project management.

Java Developer and Researcher at LIFIA

abril de 2011 - octubre de 2011 (7 meses)

Research and develop an Android Application for Knowledge Management in Communities of Practice. That was for my Thesis. I developed an Android mobile application which uses a social network, consuming REST services developed in PHP.

Research in the area of Recommender Systems, especially with Collaborative Filtering in social networks.

Technologies: JAVA, ANDROID, MYSQL, JSON and GIT.

Java Developer at Logismata

enero de 2009 - octubre de 2010 (1 año 10 meses)

Design and implementation of a java application. I was in charge of migrating an Old Swing application to a Web Application using Wicket Framework.

Technologies: JAVA, JAVASCRIPT, WICKET, JQUERY, SVN.

Design, development and maintenance of an iPhone application, developed entirely in Objective C. Using Google Maps API.

Technologies: OBJECTIVE C, SVN, CVS.

Courses

Analista en sistemas, Sistemas

Universidad Nacional de La Plata

Analista en Sistemas

Languages

Inglés

(Competencia básica profesional)

Español

(Competencia bilingüe o nativa)

Skills & Expertise

Hibernate

Spring

UML

Java

jQuery

JavaScript

Jpa

.NET

ASP.NET

Smalltalk

PHP

Spring MVC

Freemaker

Wicket

Swing

REST

Android

Objective C

Education

Universidad Nacional de La Plata

Licenciatura en sistemas, Informatica, 2003 - 2013

Universidad Nacional de La Plata

Analista en sistemas, Sistemas, 2003 - 2010

Interests

Knowkldege Management - Recommender Systems - SIG Applications - Mobile - Flash and Java Games
