Adolfo Rodriguez Robles Terán

Web UI Developer at Globant

Summary

I am a Computer Engineer, I work with a lot of attitude and I try to get better personally and professionally. I'm pretty convinced that well oriented effort, is one of the keys for success. I am a constant and persevering on my purposes. I research the things I prove interesting. My pillars are: # Willpower: to achieve objectives, although there is not always the desired motivation. # Continuous training: Because technical soundness results in productivity and quality. # Interpersonal Relationships: because we work with people and must take the communication to the most human levels possible, so as to coordinate and articulate with our peers in the most appropriate manner. My interest areas are now focused on projects that will bring together creativity, logic and relationships. I constantly seek new challenges at all levels, always trying to capitalize on the positives of each one. Currently I am self-training on the user experience design (UX), on the following topics: # Design Thinking # Usability

Experience

Web UI Developer at   Globant

August 2014 - Present (1 year)

BlackBoard # Qualicorp Brasil   # Unit testing ASP.net MVC   # Load&Performance tests with JMeter   # Training and self-training on the following technologies and areas: # ASP.net MVC   # HTML + CSS + JavaScript + jQuery   # Bootstrap   # Angular.js   # Automation + Java

Consultant at   everis-Argentina

August 2013 - July 2014 (1 year)

Banco Popular [Spain]   COBOL migrations for the spanish bank Banco Popular. We use macros for pseudo-code generation and an Eclipse-based framework for code generation. Besides tests are performed and results are documented. We are a team of fifteen people, including analysts and programmers, some of them spanish. We work with projects and tight deadlines. # Banksphere [isban - Grupo Santander] Web application development, in high level of abstraction, both back-end and front-end, using a proprietary framework based on eclipse®. The same is a complete development solution for financial institutions. What tools are involved? eclipse®, Java and Javascript programming of components used in the final solution. CVS, corporate management applications. MS Office. We work together, so cooperation and willingness is indispensable. The projects have deadlines and specific requirements.   # I study english "in-company" at the Upper Intermediate Level.

The design of everyday things [Udacity]	2015 in progress
Design Thinking: creando proyectos innovadores [Acamica]	2015 in progress
The Practical Guide to Usability [IDF]	2015 in progress

Projects

SokoMan!

December 2012 to Present

Members:Adolfo Rodriguez Robles Terán, Nicolás Majorel Padilla (Tutor)

SokoMan! is the result of my graduation work. It is based on the popular Sokoban game. It was a great personal challenge given the nature of the project, lack of information in some areas and some external drawbacks. - It was fully developed in Unity3D, programmed in Javascript. - The graphics were performed using PaintShopPro. - The sound editing was performed using Audacity. - The installer was created with Nullsoft Installer Scripting System [NSIS]. This version has 10 levels. You can download the game, ready to be installed, by clicking on the project's name. Acknowledgements: Federico Prado Enrico

Languages

English	(Full professional proficiency)
Español	(Native or bilingual proficiency)

Skills & Expertise

JavaScript
Java
HTML
C
Unity3D Game Development Engine
Automation
Diseño Gráfico
Liderazgo
Gestión de proyectos
Gestión de talento
Angular.js
CSS
ASP.NET MVC
jQuery
Bootstrap

Education

Universidad Nacional de Tucumán

Computer Engineer, Informatics/IT, 2002 - 2011

Volunteer Experience

Voluntario at   Fundacion Banco de Alimentos
June 2002 - June 2002 (1 month)

Miembro de Equipo | Curso de Liderazgo Cristóforo at   Instituto Latinoamericano de Liderazgo Cristóforo
April 2014 - Present (1 year 4 months)

Catequista at   Parroquia Nuestra Señora del Valle
March 2015 - Present (5 months)

Interests

Cutting-edge technologies, Computers, Mobile phones, Digital art, Photography, Sound/Multimedia, Music, Arts in general, Psichology, Rugby, Dinosaurs, Reading, Cience and fiction movies, Phisycal activity, HHRR, Public presentations, Oratory

Certifications
shaping-up-with-angular-js
   March 2015

Organizations
Interaction Design Foundation
